

DOC 1 · Categories & Poll Universe

Version: v1

Purpose: Define WHAT the product asks.

Categories define the worlds. Questions define the moments.

This document intentionally avoids exact questions.

Selection Framework

Every category was evaluated on:

- Participation Value
- Result Interestingness
- Experience Availability
- Reach Potential
- Discussion Potential
- Visualization Potential
- Bias Tolerance
- Data Utility

MVP prioritizes: Participation

+ Result Quality over perfect data.

FINALIZED CATEGORIES

C1 City & Place Experience

How people experience where they live.

Examples: mobility convenience public experience urban comparisons

Good because: high relevance strong visualizations

C2 Daily Life & Livability

Life friction.

Examples: commute food daily convenience

Good because: repeat participation.
